

TABLE OF CONTENTS

	PAGE
CHAPTER 1: EXECUTIVE SUMMARY	1
1.1 Current markets and projections to 2020	1
 CHAPTER 2: MARKETS FOR CARBON FIBRE: CURRENT STATUS AND FORECASTS TO 2020	 9
2.1 Aerospace and defence	9
2.1.1 Carbon fibre usage in aircraft	10
2.1.1.1 Resin and prepreg usage in aircraft	12
2.1.1.2 Composite production processes	13
2.1.2 Civil aircraft	14
2.1.2.1 Large passenger jet aircraft	16
2.1.2.1.1 Boeing	17
2.1.2.1.2 Airbus	22
2.1.2.1.3 Build rate and delivery forecasts for Airbus and Boeing	30
2.1.2.2 Regional passenger jet aircraft	33
2.1.2.2.1 Avions de Transport Regional (ATR)	33
2.1.2.2.2 Embraer	34
2.1.2.2.3 Bombardier Aerospace	36
2.1.2.2.4 Mitsubishi Heavy Industries	37
2.1.2.3 Business and general aviation (GA)	38
2.1.3 Military aircraft	41
2.1.3.1 Military fighters and trainers	43
2.1.3.2 Military transport aircraft	46
2.1.3.3 Military refuelling "tanker" aircraft	46
2.1.3.4 Military aircraft summary	47
2.1.4 Helicopters	48
2.1.5 Unmanned aircraft	52
2.1.6 Jet engines	56
2.1.7 Missile and space systems	60
2.1.8 Space telescopes	61
2.1.9 Launch vehicles	62
2.1.10 Missiles and guided bombs	65
2.1.11 Marine defence	68
2.1.12 Ground defence vehicles	69
2.1.13 CFRP tooling for aerospace	69
2.1.14 Aerospace and defence markets – summary	71
2.2 Automotive	73
2.2.1 Carbon fibre manufacturers supplying the automotive market	74
2.2.1.1 SGL Group	74
2.2.1.2 Toray Industries	75
2.2.1.3 Formosa Plastics	76
2.2.1.4 Zoltek	76
2.2.1.5 Others	76
2.2.2 Carbon fibre types and production methods	77
2.2.3 Carbon fibre usage by automobile type	78
2.2.3.1 Automobili Lamborghini	79
2.2.3.2 McLaren Group	79
2.2.3.3 General Motors (GM)	80
2.2.4 Carbon fibre demand in the automotive market	80
2.2.5 Research	82

2.2.5.1 Fuel cell vehicles.....	82
2.3 Civil engineering.....	85
2.3.1 Carbon fibre rods and plates for concrete reinforcement.....	87
2.3.1.1 Pultruded rods.....	87
2.3.1.1.1 Applications for pultruded rods.....	88
2.3.1.2 Pultruded laminates/plates.....	90
2.3.2 Carbon fibre reinforcing mesh/grid.....	91
2.3.3 Short cut carbon fibre for reinforced cement mortar and concrete.....	94
2.3.4 Carbon fibre prepregs and sheets for building/infrastructure.....	94
2.3.5 CFRP cables.....	97
2.3.5.1 Composite conductor cables.....	97
2.3.5.2 Bridge cable stays.....	98
2.3.6 Bridges.....	100
2.3.7 Conclusions.....	102
2.4 Offshore oil and gas.....	105
2.4.1 Drilling risers.....	108
2.4.2 Production risers.....	109
2.4.3 Choke and kill lines.....	109
2.4.4 Spoolable/flexible piping.....	110
2.4.5 Composite tethers.....	110
2.4.6 Carbon fibre demand in offshore applications.....	111
2.5 Pressure vessels.....	114
2.5.1 Compressed natural gas (CNG) pressure vessels.....	114
2.5.2 Bulk gas storage pressure vessels.....	123
2.5.3 Hydrogen storage vessels.....	124
2.5.4 Small pressure vessels.....	124
2.5.5 Summary and conclusions.....	126
2.6 Wind energy.....	127
2.6.1 Global markets for wind energy.....	128
2.6.1.1 Outlook for 2011 and beyond.....	130
2.6.2 The wind energy sector by country/region.....	132
2.6.2.1 China.....	135
2.6.2.2 North America.....	137
2.6.2.3 Canada.....	139
2.6.2.4 Europe.....	139
2.6.3 Key players in the wind energy market.....	145
2.6.3.1 The top ten suppliers to the wind energy sector in 2010.....	146
2.6.4 Carbon fibre demand in the wind energy market, 2010-2020.....	148
2.6.4.1 Carbon fibre demand for wind turbine blades, 2010-2020.....	148
2.6.4.2 Carbon fibre demand – other wind turbine components.....	149
2.6.5 Conclusions and market forecasts to 2020.....	151
2.7 Industrial - others sectors.....	152
2.7.1 General engineering.....	152
2.7.1.1 Industrial transmission shafts and rollers.....	154
2.7.2 Medical sector.....	156
2.7.3 Flywheels/centrifuges.....	157
2.8 Industrial markets – summary.....	158
2.9 Sports and leisure.....	160
2.9.1 Golf equipment.....	163
2.9.2 Racquets.....	164
2.9.3 Ski poles and snow boards.....	165
2.4.4 Fishing rods.....	166
2.4.5 Bicycles.....	167
2.4.6 Marine.....	168
2.10 Chopped, milled and recycled carbon fibres.....	173
2.10.1 Sheet moulding compounds (SMCs).....	177
2.10.2 Paper.....	178

2.10.3 Reinforcement/electrical conductivity.....	178
2.10.4 Milled carbon fibre.....	179
2.10.5 Carbon fibre recycling.....	180
2.10.5.1 Recycled carbon fibre supply.....	181
CHAPTER 3: CARBON FIBRE MANUFACTURERS	183
3.1 Introduction.....	183
3.2 Carbon fibre costs	191
3.3 Carbon fibre export controls.....	192
3.4 Manufactures.....	195
3.4.1 Akrilik Kimya Sanayii AS (AKSA).....	195
3.4.2 Cytex Industries Inc.....	197
3.4.3 Formosa Plastics Corp.....	209
3.4.4 Hexcel Corp	212
3.4.5 Mitsubishi Plastics Inc.....	223
3.4.6 Mitsubishi Rayon Co Ltd / Grafil Inc.....	227
3.4.7 Nippon Graphite Fiber Corp.....	239
3.4.8 SGL Group.....	246
3.4.9 Toho Tenax Co Ltd	256
3.4.10 Toray Industries Inc.....	263
3.4.11 Zoltek Companies Inc	279
3.4.12 Other carbon fibre producers (by country / region)	289
3.4.12.1 China.....	289
3.4.12.2 South Korea	296
3.4.12.3 India	297
3.4.12.4 Saudi Arabia.....	299
CHAPTER 4: CARBON FIBRE SUPPLY AND DEMAND: CURRENT STATUS AND FORECASTS TO 2020	301
4.1 Carbon fibre demand 2011-2020	301
4.1.1 Wind energy	308
4.1.2 Automotive	308
4.1.3 Industrial.....	309
4.1.4 Aerospace and defence	312
4.1.4.1 Large passenger aircraft	312
4.1.4.2 Business jets and general aviation.....	313
4.1.5 Sports and leisure	316
4.1.6 Carbon fibre demand by conversion route.....	318
4.1.6.1 Carbon fibre textile reinforcements	318
4.1.6.2 Carbon fibre prepregs	319
4.1.6.3 Filament winding and fibre placement.....	320
4.1.6.4 Pultrusion/pulwinding	321
4.1.6.5 Carbon-carbon composites (CCCs).....	322
4.1.6.6 Summary of conversion routes, with forecasts to 2020	323
4.1.7 Summary of carbon fibre demand, with forecasts to 2020.....	327
4.1.7.1 Small tow and large tow PAN-based carbon fibre.....	327
4.2 Carbon fibre supply	328
4.2.1 Supply summary	335
4.3 Conclusions.....	336
APPENDIX	341
1 History	341
2 Technology.....	343
2.1 Precursor / carbon fibre production.....	343

2.1.1	Polyacrylonitrile (PAN)-based carbon fibre	343
2.1.2	Pitch-based carbon fibre	352
2.1.3	Cellulose/rayon-based carbon fibre	354
2.1.4	Comparison of the three major carbon fibre production routes	356
2.2	Intermediate production processes	357
2.2.1	Textiles	358
2.2.1.1	Bi-directional woven fabrics	358
2.2.1.2	Unidirectional (UD) woven fabrics	362
2.2.1.3	Multiaxial / non-crimp fabrics (NCFs)	362
2.2.1.4	3D fabrics	365
2.2.1.5	Braiding	367
2.2.2	Prepregs	369
2.2.2.1	Resin matrices	370
2.2.2.2	Prepreg manufacturing routes	372
2.2.2.3	Reinforcements for prepregs	374
2.3	Direct conversion	376
2.3.1	Filament winding	376
2.3.2	Fibre placement	380
2.3.3	Pultrusion/pulwinding	381
2.4	Carbon-carbon composites	383
2.4.1	Manufacturing technology	384
2.4.2	Chemical vapour deposition (CVD)	385
2.4.3	Resin char process	386
2.4.4	Polyacrylonitrile (PAN)	388
2.5	Composite production processes	388
2.5.1	Wet/hand lay-up	388
2.5.2	Vacuum bagging	389
2.5.3	Resin transfer moulding (RTM)	390
2.5.4	Resin film infusion (RFI)	391
2.5.5	Compression moulding	392
2.5.6	Autoclave moulding	393
2.5.7	Injection moulding	394
2.5.8	Thermoforming	395
2.5.9	Mandrel wrapping	396
3	Company directory	397

TABLES

Table 1.1: PAN-based carbon fibre manufacture by country/region, 2011, 2015 and 2020 (tonnes/%)	3
Table 1.2: PAN-based carbon fibre demand by country/region, 2011, 2015 and 2020 (tonnes/%)	3
Table 1.3: Value of various stages of carbon fibre reinforced plastics (CFRPs) business from fibre tow to finished components, 2011, 2015 and 2020 (tonnes/\$)	8
Table 2.1: CFRP utilisation in civil aircraft: % breakdown by fibre type, 2003-2020	11
Table 2.2: Carbon fibre usage in the aerospace sector, by product form, 1996-2020	12
Table 2.3: Types and properties of thermoplastic resins	14
Table 2.4: Aircraft deliveries by aircraft type, 2005-2011 (number of aircraft)	15
Table 2.5: Aircraft deliveries by major manufacturer, 2005-2011	15
Table 2.6: Major civil passenger aircraft suppliers: orders, deliveries and backlog, 2008-2010	16
Table 2.7: Manufacturers of composite parts for the Boeing 787	19
Table 2.8: Boeing 787 build rate and carbon fibre buy weight demand, 2011-2020 (tonnes)	21
Table 2.9: Airbus A380 build rate and carbon fibre buy weight demand, 2010-2020 (tonnes)	26

Table 2.10: Airbus A350 build rate and carbon fibre buy weight demand, 2012-2020 (tonnes).....	30
Table 2.11: Boeing and Airbus deliveries and orders per aircraft type, 2008-2011	31
Table 2.12: Large passenger aircraft build programmes, 2011-2020	32
Table 2.13: Carbon fibre buy weight demand for large passenger aircraft, 2010-2020 (tonnes).....	32
Table 2.14: ATR: aircraft production and carbon fibre usage, 2011-2020	34
Table 2.15: Embraer: aircraft production and carbon fibre usage. 2011-2020.....	35
Table 2.16: Bombardier: aircraft production and carbon fibre usage, 2011-2020	37
Table 2.17: Worldwide production of regional aircraft and carbon fibre demand, 2011-2020 (tonnes).....	37
Table 2.18: Deliveries of business jets and general aviation (GA) aircraft, 2008, 2009 and 2010	39
Table 2.19: Deliveries of business and general aviation (GA) aircraft by type, 2011-2020.....	40
Table 2.20: Carbon fibre buy weight demand in the business jet and general aviation sector worldwide, 2011-2020 (tonnes).....	41
Table 2.21: Composites content of military aircraft, by type (% of airframe weight)	41
Table 2.22: Military fixed-wing aircraft production worldwide, 2005-2020 (number of aircraft)	42
Table 2.23: Composite demand from fighters and trainer aircraft by flyaway weight, 2007-2016 (tonnes).....	45
Table 2.24: Military aircraft deliveries worldwide, 2011-2020.....	47
Table 2.25: Carbon fibre demand by buy weight in military fighter jets, trainers and tankers/transport worldwide, 2011-2020 (tonnes).....	48
Table 2.26: Turbine powered helicopter deliveries worldwide and carbon fibre demand, 2011-2020 (tonnes).....	49
Table 2.27: Demand for CFRP and carbon fibre by top ten helicopter programmes, ranked by forecast flyaway weight demand of CFRP, 2010-2015-2020 (tonnes)	51
Table 2.28: Production of UAVs, 2011-2020	53
Table 2.29: Carbon fibre buy weight demand in the UAV market, 2010-2020 (tonnes).....	56
Table 2.30: Turbofan and turbojet engine production worldwide, 2010-2015 and 2020 (number of engines).....	57
Table 2.31: Jet engine deliveries and CFRP/carbon fibre demand worldwide, 2010-2020	57
Table 2.32: Manufacturers of commercial aircraft engines and their market share, 2010-2015.....	58
Table 2.33: Manufacturers of business aircraft engines and their market share, 2010-2015.....	58
Table 2.34: Manufacturers of military aircraft engines and their market share, 2010-2015	58
Table 2.35: Major launch rockets, 2010-2020	63
Table 2.36: Carbon fibre demand in space systems (satellites/launch vehicles) sector worldwide, 2010-2020 (tonnes).....	65
Table 2.37: Production of missiles and guided bombs worldwide, 2010, 2015 and 2020.....	66
Table 2.38: Carbon fibre demand in JASSM missile programme, plus other missiles and guided bombs, 2010-2020 (tonnes)	67
Table 2.39: Carbon fibre (buy weight) demand in the military vehicle sector (excluding aerospace programmes) worldwide, 2010-2020 (tonnes)	69
Table 2.40: Carbon fibre demand in aerospace tooling market, 2010-2020 (tonnes).....	71
Table 2.41: Carbon fibre flyaway weight / buy weight comparison, 2010, 2015 and 2020 (tonnes).....	71
Table 2.42: Carbon fibre flyaway weight / buy weight comparison, 2010-2020 (tonnes)	71
Table 2.43: Carbon fibre buy weight demand in the aerospace and defence sector worldwide, 2011-2020 (tonnes).....	72
Table 2.44: Fabrication techniques typically used in the production of CFRP parts for automobiles.....	77
Table 2.45: Carbon fibre demand forecasts for the automotive market, 2010, 2015 and 2020 (tonnes).....	81

Table 2.46: Carbon fibre demand in the automotive industry worldwide, 2011-2020 (tonnes) ..	81
Table 2.47: Manufacturers of pultruded carbon fibre rods suitable for concrete reinforcement ..	89
Table 2.48: Properties of various types of chopped fibres for concrete/cement reinforcement ..	94
Table 2.49: Carbon fibre demand in the civil engineering sector worldwide, by application, 2011-2020 (tonnes).....	103
Table 2.50: Carbon fibre demand in the civil engineering sector worldwide, by conversion route, 2011-2020 (tonnes) ..	104
Table 2.51: Demand for carbon fibre in the offshore industry worldwide, 2011-2020 (tonnes).....	112
Table 2.52: Demand for carbon fibre in the offshore industry worldwide, by processing route, 2010-2020 (tonnes).....	113
Table 2.53: Top 10 countries for natural gas vehicles by number of vehicles and refuelling stations, 2010.....	114
Table 2.54: Number of NGVs by region and vehicle type, 2010 (millions).....	115
Table 2.55: Percentage of NGV vehicles by region, 2009 ..	115
Table 2.56: Average US fuel prices, as of April 2010 (US Dollars) ..	116
Table 2.57: CNG pressure vessel types: costs and market share ..	117
Table 2.58: Carbon fibre demand in the pressure vessels sector worldwide, 2011-2020 (tonnes).....	118
Table 2.59: Growth in CNG pressure vessels market, and carbon fibre demand, 2011-2020.....	122
Table 2.60: Carbon fibre demand in bulk gas storage pressure vessels market worldwide, 2011-2020 (tonnes).....	124
Table 2.61: Hydrogen-powered vehicles: worldwide growth and carbon fibre demand, 2011-2020 (tonnes).....	124
Table 2.62: Carbon fibre demand for pressure vessels worldwide, 2011-2020 (tonnes)	126
Table 2.63: Top 10 countries by wind energy capacity installed in 2010 (MW)	132
Table 2.64: Top 10 countries by cumulative wind energy capacity at end of 2010 (MW)	133
Table 2.65: Global wind energy capacity by country/region, 2009-2030 (GW)	134
Table 2.66: Total cumulative installed wind energy capacity in China, 2001-2010 (MW)	135
Table 2.67: Installed capacity of 7 GW scale Wind Power Bases, 2010, 2015 and 2020 (MW)	136
Table 2.68: Cumulative installed wind energy capacity in North America, 2000-2010 (MW) ...	138
Table 2.69: Installed wind energy in the European Union (EU27 countries), 2010-2020 (MW)	143
Table 2.70: Top 10 wind turbine suppliers worldwide, 2010 (MW).....	145
Table 2.71: Carbon fibre demand forecasts for the wind energy market, 2010, 2015 and 2020 (tonnes).....	148
Table 2.72: Carbon fibre/CFRP demand for wind turbine blades, 2005, 2010, 2015 and 2020 (tonnes).....	149
Table 2.73: Industrial (other sectors): global carbon fibre demand, 2010-2020 (tonnes).....	158
Table 2.74: Major manufacturers of carbon fibre masts and spars worldwide	171
Table 2.75: Demand for carbon fibre in the sports and leisure markets worldwide, 2011-2010 (tonnes).....	172
Table 2.76: Demand for carbon fibre in the sports and leisure markets worldwide, by processing route, 2011 -2020 (tonnes)	172
Table 2.77: Producers of chopped and milled carbon fibre and their production levels (tonnes).....	174
Table 2.78: Chopped and milled carbon fibre requirements by end use.....	174
Table 2.79: Chopped/milled carbon fibre: demand by application, 2011-2020 (tonnes)	179
